

# Proposed acquisition of Vos Logistics by Jacky Perrenot

Today Jacky Perrenot Group confirmed its intention to acquire Vos Logistics. The proposed acquisition is part of Jacky Perrenot's international growth plan and its ambition to reach €2 billion in revenue by 2027. Completion of the transaction remains subject to customary consultations and regulatory approvals.

Following the acquisition of ArrowXL in the United Kingdom in June 2025, this project reflects the Group's determination to strengthen its position among Europe's leading logistics players.

## A PARTNERSHIP SERVING A SHARED EUROPEAN AMBITION

With revenue of €1.3 billion, Jacky Perrenot has, for several decades, been a benchmark in transport and logistics, recognised for its operational excellence, customer focus, and leadership in transport decarbonisation.

Vos Logistics, a Dutch based European logistics provider with 35 branches in 6 European countries, generates €370 million in annual revenue and is recognised for its expertise in international transport, multi-country distribution, and value-added contract logistics.

Together, the two groups will form a pan-European organisation combining strong domestic networks with enhanced international transport capabilities.

## BUILDING A RESPONSIBLE AND CUSTOMER-DRIVEN EUROPEAN CHAMPION

The combined entity will represent around €1.7 billion in annual revenue, supported by over 12,000 employees across Europe.

It will strengthen geographic coverage, the performance and flexibility of logistics operations, and the range of integrated solutions offered to manufacturers, retailers, healthcare, construction and e-commerce clients throughout the continent.

**Philippe Givone**, Chairman of Jacky Perrenot Group, said :

« This proposed acquisition is fully in line with our growth strategy and our ambition to build a European leader in sustainable transport and logistics. By joining forces, we can offer our clients broader coverage, higher value-added services, and a responsible model focused on performance. »

**Philippe Cuoc**, CEO of Jacky Perrenot Group, added :

« Our industry is undergoing a profound operational, technological, and environmental transformation. We aim to accelerate this transition and position Jacky Perrenot as a long-term partner for our clients across Europe. »

**Frank Verhoeven**, CEO of Vos Logistics, stated :

« This partnership is a tremendous opportunity to create one of Europe's most complementary transport and logistics networks. We share with Jacky Perrenot common values and will be happy to jointly build on a European champion. »

## A SHARED CULTURE AND ALIGNED VALUES

Over the years, both groups have developed a service oriented culture based on customer focus, commitment, responsibility, and proximity. This alignment of human, technological and environmental values provides a solid foundation for building a high-performing, forward-looking European group.

## A PROJECT ALIGNED WITH THE TRANSFORMATION OF THE LOGISTICS SECTOR

This partnership comes at a time of profound change in the European logistics landscape, characterised by :

- growing demand for global and integrated solutions,
- the need for greater supply-chain agility,
- accelerating environmental and decarbonisation requirements, and
- the consolidation of the market on a European scale.
